ELECTRIC COOPERATIVES POWER IOWA'S ECONOMIC GROWTH

BY CHUCK SODERBERG

You depend on your local electric cooperative to power your life every day, but did you know that your co-op also powers economic growth in your region?

Earlier this year, the Iowa Association of Electric Cooperatives commissioned an economic impact study through the esteemed Goss & Associates of Omaha. This study confirmed what we've long known about our association members: Iowa's locally owned electric co-ops contribute greatly to the state's economy.

For the five years ending in 2021, the study found that Iowa electric co-ops generated a total impact on the state of \$4.8 billion, produced \$688 million in wages and salaries, directly supported 1,961 jobs, generated self-employment income of \$79.5 million and paid \$144.7 million in state and local taxes.

Powering people and communities

Powering lives and empowering communities are at the core of our cooperative mission. This economic analysis is helpful as we talk with legislators, policymakers and other decision-makers about how electric cooperatives invest in rural Iowa. For more than 80 years, electric co-ops have maintained reliable and affordable electric service, provided stable career opportunities and paid taxes, which have vast ripple effects throughout the regions we serve.

Not only have electric co-ops' economic impacts been historically significant, but the study also concludes that co-ops have assisted local and state organizations in retaining, attracting and expanding businesses in the state. Separate from their spending impacts, electric cooperatives invest in efforts to attract and retain jobs and investment within their communities.

In addition to their daily duty of providing safe, reliable and affordable power,

the study found that Iowa electric cooperatives had an impact of \$14.7 billion in economic development projects between 2018 and 2022, supporting 7,366 jobs (retained, attracted or expanded) during that same time period.

An important connector

Your electric cooperative has undoubtedly supported many economic development initiatives over the decades by serving as an intermediary for U.S. Department of Agriculture revolving loan funds, among other programs and projects. For example, several Iowa electric co-ops have been instrumental in developing industrial speculative buildings to accommodate local business expansion or to attract new businesses and jobs to the community. Iowa's electric cooperatives also give generously to local charitable causes and support youth education initiatives.

You should be proud of your local electric co-op's contributions to Iowa's economy. As a member-owned and locally governed entity, your electric co-op is more than a service provider; it's a major economic engine of progress for your community.

Chuck Soderberg is the executive vice president and general manager of the Iowa Association of Electric Cooperatives.

Access a PDF of our 2023 economic impact study at www.iowarec.org.

Economic Impact: By the Numbers

For the five years ending in 2021, Iowa electric cooperative investments and operations generated the following impacts on the state of Iowa.

\$14.7 BILLION Impact in economic development projects.

\$4.8 BILLION Overall economic activity.

\$688.1 MILLION In wages and salaries.

\$79.5 MILLION Self-employment income.

\$144.7 MILLION In state and local tax collections.

1,961 JOBS Supported each year.

EDITOR'S CHOICE CONTEST

WIN A RING SPOTLIGHT SECURITY CAMERA!

Shine a light on your home security with a Ring spotlight security camera – a versatile outdoor dynamo fit for any property.

See vivid detail with HD video in almost any weather. Deter threats with built-in spotlights. And get real-time alerts when there's motion in your yard.

Visit our website and win!

Enter this month's contest by visiting www.ieclmagazine.com no later than Nov. 30. You must be a member of one of Iowa's electric cooperatives to win. There's no obligation associated with entering, we don't share entrant information with anyone and multiple entries from the same account will be disqualified. The winner of the wireless weather station from the September issue was Nathan Stauffer, a Butler County Rural Electric Cooperative member-consumer.

CO-OP UNDERGOING COST-OF-SERVICE STUDY

BY MICHAEL GEERDES

Rate structuring, regardless of industry, is a complicated and time-consuming process – and one that Grundy County REC is currently undergoing.

With the help of an independent rate consultant, a cost-of-service study is being conducted to look at each rate class. It is focused on ensuring the cost of providing service to that class is fair and equitable, that the revenue coming in covers the costs associated with delivering electricity, and that our rates are set up in such a way to help, not hinder, the cooperative in achieving our goals of safe and reliable electric service while remaining affordable.

Once this study is complete, our cooperative management and the board of directors will closely analyze the data

to determine if a rate adjustment is necessary. Adjusting rates is a decision that the cooperative doesn't take lightly, and as we work to make decisions regarding rates, please know that we are always working diligently to minimize the impact on you. We are a not-for-profit business, and we are accountable to you, our members, not outside investors.

We want to go through some common questions regarding cost-of-service and rate structuring. As always, please reach out to the co-op directly with any specific questions you may have.

What is our current rate structure?

If you are on a single-phase rate, your current rate structure is made up of three things. First is the monthly service charge. This is a cost that helps the co-op recover costs for wires, transformers and poles. Second is the kWh (energy charge), and we use a block rate. This means after 800 kWh, you will get a discount for any more kWh used for the month. Third is the Power Cost Adjustment (PCA). The PCA is used to pass through any increases in power costs from our power providers, generation and transmission cooperatives.

What is my rate class (type)?

It is easy to determine what your rate type is. On the second (back) page of your bill, there is a blue table with your billing period, readings and usage. The far-right column of this chart shows your rate type.

When was the last time a rate adjustment occurred at Grundy County REC?

Our rates have remained the same for nearly six years. The last cost-of-service study was conducted in 2017, with a rate adjustment in 2018.

If a cost adjustment is necessary, when would that likely take place?

As we are still in the process of the cost-of-service study being completed, we do not have an exact timeline. However, if a cost adjustment is necessary, it would most likely take place in the second quarter of 2024.

What can I expect going forward as the cooperative continues working through the cost-of-service study process?

The cooperative will share additional information and updates over the next few months through articles in *Iowa Electric Cooperative Living* magazine. If it is determined that a rate adjustment is necessary, information will be shared regarding how the adjustments will impact each rate class and what it means for members.

What is the cooperative doing to help mitigate costs for the members?

We take great pride in our efforts to mitigate the increased costs of materials for our members. Using grant programs, government Federal Emergency Management Agency programs, and strategic sourcing of materials, we have been able to do a variety of large projects that help the cooperative maintain and increase the reliability of our infrastructure without having to pass those costs on to you, our members. However, the increased costs of materials and inflation are continuing to impact the cost of service.

What can I do now to help with my electric bill?

1. Request a FREE energy audit from our member services department.
2. Complete energy-efficient home improvements and submit rebates to the cooperative.
3. Sign up for budget billing.
4. Sign up for SmartHub to monitor your daily usage and set usage alerts.
5. Start thinking about what appliances you are running and the time of day you're using them.
6. Open your blinds and curtains during the cooler months and keep them closed during the warmer months.

Michael Geerdes is the general manager of Grundy County REC.

A Touchstone Energy Cooperative

HOT PRICING ON WATER HEATERS

Why spend box-store prices on a water heater when you can purchase one from Grundy County REC at a fraction of the price?

Size	Dimensions	Member Price* (plus tax)
50 gallon	66 ¾ x 23 ½	\$250
85 gallon	70 ¼ x 28 ¼	\$250
105 gallon	70 ¾ x 30 ¼	\$250

But wait! Did you know? Water heaters for new construction and conversion from gas to electric are **FREE*** to members!

These top-rated, durable Marathon water heaters come with a lifetime warranty to the original owner.

Interested? Contact Brady Codner, member service advisor, at 319-824-5251 to learn more.

**Must enroll in load management program to receive member price. Member pricing assumes all incentives/agreements and is not eligible for an additional rebate. Member pricing as of Jan. 1, 2023, subject to future change.*

CO-OP SATISFACTION SCORE INCREASES

The numbers are in, and Grundy County REC has once again seen an increase in our ACSI score! This member satisfaction survey is conducted by an independent third party. Touchstone Energy Cooperative released a statement in September announcing the 25 cooperatives across the country with the Top 5 ACSI Scores for the quarter. We are very excited to announce that Grundy County REC made the list along with one other Iowa cooperative!

VETERANS DAY

The cooperative offices will be closed on Friday, Nov. 10, in observance of Veterans Day.

Today, and every day, we honor America's veterans for their patriotism, love of country, and willingness to serve and sacrifice.

LOCAL STUDENTS JOB SHADOW CO-OP LINEMEN

Two local students from Aplington-Parkersburg School District job shadowed Grundy County REC linemen last month. This was a great opportunity to learn more about the career path and the work linemen do.

THANKSGIVING

The cooperative offices will be closed on Thursday, Nov. 23, and Friday, Nov. 24, in honor of the Thanksgiving holiday.

We are so thankful for our wonderful members and wish you all a very Happy Thanksgiving!

As always, our phones are answered 24/7, year-round.

SHOP CO-OP LOCAL THIS HOLIDAY SEASON

BY ANN FOSTER THELEN

It's time to start this year's holiday shopping, and it's easy to be merry when you surprise a loved one with a special gift.

During the holiday season, shopping local is a festive way to support your friends and neighbors who are also business owners. Many of these small businesses are served by Iowa's electric cooperatives and share a common mission – being committed to the communities they serve.

To help your holiday gift-giving or list-making, we've combined a list of electric cooperative-served businesses that offer unique gifts to place under the Christmas tree or in a stocking. As you embark on Santa Claus duties this year, keep in mind that this list is just a sampling of local businesses. Take a walk along your community's Main Street or explore all that your local area offers for additional inspiration to shop local this holiday season!

300 ACRES

www.300acres.llc

Facebook: 300acres

300 Acres is a local and veteran-owned business in Ocheyedan (located on Business Corner near May City). They focus on supplying the highest-quality products, which include LED lights, shovels, coffee, coolers, custom decals, signs and much more.

ADVANTAGE APPAREL

www.advapparel.com

Facebook: advapparel2019

Advantage Apparel is a local small town, family-owned, one-stop apparel shop in Albia. They pride themselves on quick turnarounds, with quality service guaranteed on business, school and sports logos, stadium chairs, uniforms, sportswear and other items.

BLOOMS & THINGS

www.albiablooms.com

Facebook: albiablooms

The shop offers arrangements for every special occasion. It also has green plants, silk flowers and small gift items such as candles, soaps and journals. Orders can be delivered throughout Albia and surrounding communities within a 20-minute radius.

BOUILLON FLOWER & GARDEN

www.bouillonflower.org

Facebook: [BouillonFlowerGarden](#)

Bouillon Flower & Garden in Greene is a one-stop-shop for flower-related needs. They boast an impressive selection of flowers and arrangements for everyone's taste! From home décor options to bouquets for special occasions – there's always a reason to invest in a beautiful arrangement.

BRITCHES 'N' BOWS COUNTRY STORE & BOUTIQUE

Facebook: [shopbnb](#)

Gift and décor shop in Panora offering modern farmhouse décor, boutique-style clothing and trendy accessories.

CORNCRIB DESIGNS

www.corncribdesigns.com

Facebook: [corncribdesigns](#)

A trending shop filled with farmhouse vibes, traditional and seasonal home décor, apparel, and vintage and repurposed finds. The business features a mobile trailer, which offers pop-up shopping around rural Iowa. Corncrib Designs strives to inspire patrons to transform your home into a place you love.

FOREST MILLS QUILT SHOP

www.forestmillsquilts.com

Facebook: [forestmillsquiltshop](#)

This unique quilt shop is located just south of the beautiful Yellow River outside of Postville on the family's Century Farm. They carry material, quilt kits, quilts for sale and host events.

GRAND VIEW BEEF

www.grandviewbeef.com

Facebook: [GrandViewBeef](#)

For more than 100 years, the Severson family has been farming in Clarion and calling Grand View Farm and Ranch home. Now, people across the nation can enjoy their products. Send or receive a box of this family-raised, 100% grass-fed beef. The meat is shipped on Monday in a compostable cooler with dry ice and arrives within two days.

J&J CANDLES

www.jjcandlesmanson.com

Facebook: [jjcandlesmanson](#)

J&J Candles is a family-owned business that has been offering handcrafted, scented products for more than 25 years. They feature nearly 200 scents. In addition to individual sales, they offer wholesale pricing with minimum orders and do fundraisers. All the scented products are made at its facility south of Manson.

MOLLY'S

Facebook: [mollyscountrystore](#)

Molly's in Audubon is an old barn turned retail store with home décor, clothing and more!

PROMISELAND WINERY

www.Promiselandwinery.com

Facebook: [promiselandwinery](#)

Located on the southern hills of Guttenberg along the Great River Road, this winery offers a full experience of tasty wines, food, six boutiques for shopping and beautiful views!

RECREATION UNLIMITED

www.recreationunlimited.net

Facebook: [recreationunlimited04](#)

A family-owned and operated business in Traer offering top-notch outdoor equipment and accessories, including Green Mountain Grills.

THE RED SHED

Hwy. 63, Bloomfield

The Red Shed has a wide variety of gifts, handmade chocolate and Amish-made items.

RHONDA'S COUNTRY RETREAT

Facebook: [rhondascountryretreat](#)

Rhonda's Country Retreat was founded in October 2020. This home-based specialty shop offers Iowa-made home décor, jewelry, soy candles, Iowa wines and more. All available products can be purchased at her farm store or online.

SHELBBIE DEBOLT DESIGNS

www.etsy.com/shop/ShelbieDeBoltDesigns

Facebook: [shelbiedeboltdesigns1](#)

Operating via an Etsy shop, Shelbie Ehlers makes custom clothing, including holiday and everyday items.

SWEET HONEYMOON WINERY

www.sweethoneymoonwinery.com

Facebook: [sweethoneymoonwinery](#)

Sweet Honeymoon Winery is a craft winery in Calhoun County making quality wines (including dry wines) in small batches from imported grape juice from all around the world.

Because of this approach, the business offers varietals not normally available to wineries in our northern climate.

They also make an award-winning Mead (honey wine).

Ann Foster Thelen is the editor of Iowa Electric Cooperative Living magazine.

To find more local businesses in your area, check with your local chamber of commerce or electric cooperative. Happy shopping!

SPECTACULAR
SLOW COOKER
RECIPES

SLOW COOKER MAID-RITES

- 3 pounds hamburger
- 3 beef bouillon cubes
- ½ cup hot water
- 1 can chicken gumbo soup
- 3 tablespoons Worcestershire sauce
- 3 teaspoons dry mustard

Cook meat and drain. Dissolve bouillon in hot water. Add remaining ingredients and place in slow cooker for 4 hours.

**Karen Caldwell • Albia
Chariton Valley Electric Cooperative**

PEACHY KEEN SWEET POTATOES

- 2 pounds sweet potatoes
- 1 cup peach pie filling
- 2 tablespoons butter, melted
- ¼ teaspoon salt
- ¼ teaspoon pepper

Put all ingredients in slow cooker. Cook on low for 5-7 hours.

**Marlene Burns • Swisher
T.I.P. Rural Electric Cooperative**

SLOW COOKER PORK CUTLETS

- 1 can beef stock
- 1 can cream of mushroom soup
- 1 package brown gravy mix
- 1 package onion soup mix
- 2 pounds pork cutlets
- ½ pound mushrooms
- salt, to taste
- pepper, to taste
- mashed potatoes

Pour beef stock, cream of mushroom soup, gravy mix and onion soup mix in slow cooker and stir together. Season cutlets with salt and pepper. Add to slow cooker and top with mushrooms. Cook on low for 4-6 hours. Serve over mashed potatoes. *Serves 4-6*

**Tiana Stroman • Merrill
North West Rural Electric Cooperative**

SLOW COOKER APPLE CRISP

- 2 cans apple pie filling
- 1 package butter pecan cake mix
- ½ stick butter, sliced

In the order listed, layer ingredients in slow cooker. Don't stir. Cook on high for 2 hours.

**Cindy Pottebaum • Alton
North West Rural Electric Cooperative**

CREAM CHEESE CHICKEN

- ½ cup butter
- 1 7-ounce envelope Italian dressing mix
- 2 pounds boneless chicken breasts
- 1 10.75-ounce can cream of chicken soup
- 1 8-ounce package cream cheese
mashed potatoes, rice or noodles

Melt butter in bottom of slow cooker on high. Stir in Italian dressing mix until well mixed. Cut chicken into 1-inch strips. Place chicken in slow cooker and stir to coat with butter and dressing mix. Cook covered on high for 2 hours.

Remove chicken and set aside. Add soup and cream cheese to liquid in slow cooker. Stir to melt until smooth and creamy. Add chicken back to slow cooker and turn to low until ready to serve.

Serve over mashed potatoes, rice or hot buttered noodles. Can be frozen for a great make-ahead meal. *Serves 6*

Regina V. Lloyd • Linden

Guthrie County Rural Electric Cooperative Association

SLOW COOKER PIZZA-LASAGNA

- 1 pound ground beef
- 1 medium onion, chopped
- 1 98-ounce package mini lasagna noodles
- 1 package pepperoni
- 1 28-ounce jar spaghetti sauce
- ¾ cup Parmesan cheese, freshly grated
- 10 ounces cheddar cheese, grated
- 2 cups mozzarella cheese, grated

Cook beef and onion until meat is browned, drain. Cook noodles until almost tender (you can substitute with rotini). Combine all ingredients except Mozzarella cheese in layers in slow cooker. Sprinkle Mozzarella cheese over top. Bake on low for 5-7 hours, or on high for 2 hours.

Larae Van Wyhe • Lester
Lyon Rural Electric Cooperative

ITALIAN ROUND STEAK

- 2 pounds round steak
salt and pepper
- 3 cans Italian diced tomatoes
- 2 cans French-style green beans
onion, to taste, sliced

Cut steak into serving-sized pieces, season with salt and pepper. Place all ingredients in slow cooker. Cook on high for 4 hours or low for 7 hours. *Serves 4-5*

Gladys Willey • Yale

Guthrie County Rural Electric Cooperative Association

APPLE STREUSEL DESSERT

- 6 cups apples, sliced
- 1¼ teaspoons cinnamon
- ¼ teaspoon allspice
- ¼ teaspoon nutmeg
- ¾ cup milk
- 5 tablespoons butter, divided
- ¾ cup sugar
- 2 eggs
- 1 teaspoon vanilla
- 1½ cups Bisquick baking mix, divided
- ½ cup brown sugar
ice cream or cream

Toss apples with spices. Place apples in greased slow cooker. In a bowl, combine milk, 2 tablespoons butter, sugar, eggs, vanilla and ½ cup baking mix. Pour over apples. Combine 1 cup baking mix, brown sugar and 3 tablespoons butter. Sprinkle over apples. Cover and cook on low for 6-7 hours. Serve with ice cream or cream.

ENERGY-SAVING GADGETS & GIZMOS

BY PAUL WESSLUND

With the holidays approaching, shoppers will soon be eying an abundance of devices and gadgets to gift friends and loved ones – or to buy for themselves.

Many consumers are turning to smart home devices that offer convenience and other benefits, including one often-overlooked perk: energy savings. With so many options available, choosing the best tech for your needs can be overwhelming.

The following four tips can help you determine the right smart home technologies for your home.

When it comes to cool new technology, many consumers are turning to smart home devices that offer convenience and other benefits, including energy savings.

Smart home technologies allow you to sync devices throughout your home, offering greater control and convenience.

Smart thermostats offer convenience and achievable energy savings.
Photo Source: Ecobee

1 ASK YOURSELF HOW SMART YOU WANT YOUR HOME TO BE.

Smart plugs, energy-use apps and home monitors are cool devices that can help you save energy. But it helps to understand how they work to make the most of them. Before you invest your time and money, ask yourself, how much technology do you want? What are your habits when setting up and using the latest development? If you like to tinker, an energy app on your phone could be fun and help you save money. But as electronics get smarter, even non-tech-savvy people find them easier to use.

2 GET THE MOST BANG FOR YOUR BUCK.

The most frequently recommended energy-saving device is a smart thermostat. And that makes sense because the thermostat controls your heating and cooling, which account for the most energy consumption in your home. Smart thermostats can program an energy schedule to adjust the heating or cooling when you're sleeping or out of the house during the day. Additional smart thermostat features include detecting movement in a room to adjust energy use, learning your daily habits, responding to voice commands and tracking the weather.

Renters might even be able to convince a landlord to pay for an energy-saving smart thermostat.

If you have a heat pump, contact your electric co-op before using a smart thermostat. Lowering the temperature too much when you're not home could result in switching to more expensive auxiliary heat to bring the house back to room temperature.

Other devices that can produce energy savings for minimal cost and effort include smart light bulbs, outlets and charging stations.

3 DETERMINE YOUR ENERGY-SAVING GOALS.

A home energy monitor is one way to save on electricity, and the range of choices means you'll need to ask how much you're willing to pay and if it's worthwhile. One study found that spending about \$1,800 on a full home, commercially installed energy monitor could save about 16% on electric bills and pay for itself in 10-15 years. Much less ambitious approaches involve downloading an app on your phone to keep track of your electricity use and even turning smart appliances on and off when you're away.

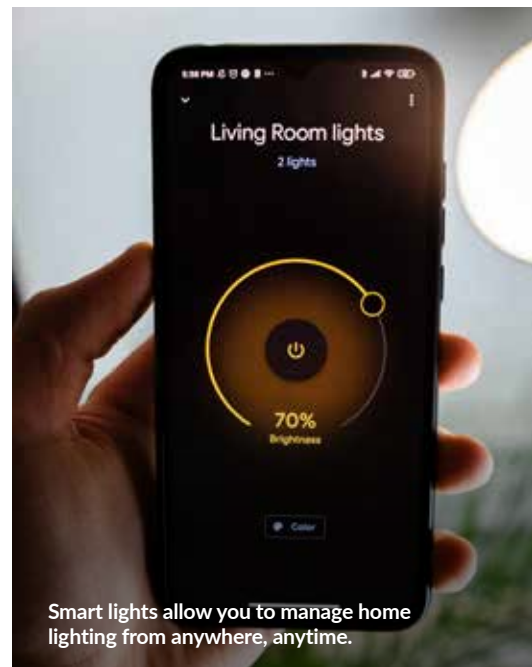

4 DO A SIMPLE ENERGY CHECKUP.

Take a walk through your home with the intention of identifying everything that uses electricity. You'll likely notice a lot of functions that could be managed with smart devices. If your phone sits plugged in long after it's charged, smart power strips and smart outlets can stop the electricity use when the battery is at 100%. Smart

light bulbs can be controlled with an app on your phone, saving energy and giving your home that lived-in look when you're away. Ceiling fans can now adjust themselves for the best air flow, depending on the temperature. Motion detectors can turn indoor lights on and off when you enter or leave a room; even solar-powered outdoor lights can detect when you're approaching and light the way.

With just a little planning, you can make sure this gift-giving season is merry, bright – and smart.

Paul Wesslund writes on consumer and cooperative affairs for the National Rural Electric Cooperative Association, the national trade association representing more than 900 local electric cooperatives.

Smart lights allow you to manage home lighting from anywhere, anytime.

SKAKENBERG COMPLETES IRONMAN

Apprentice Lineman Derek Snakenberg completed an Iron Man in Wisconsin in September! He placed 264/1058 and finished in 12 hours 34 seconds.

"I enjoy these races because it's me versus adversity. It's a reminder to believe in yourself and choose to be strong. We are all capable of doing hard things and we can do so much more than we know. I want my races to show my kids that they too can be confident and believe in whatever they choose," Snakenberg shares.

In case you were wondering, an Iron Man is:

- 1 2.4-mile swim
- 2 112-mile bike ride
- 3 26.2-mile run

TAKE CONTROL OF YOUR ACCOUNT WITH SMARTHUB

Curious about your usage or how your bill compares to previous years or months? Or do you simply want to sign up for autopay? Then you need SmartHub!

Visit www.grundycountyrecia.com and click the "Online Bill Pay" button to access the web app. If you prefer the mobile app option, go to your mobile store and search for SmartHub. You will need the following information to register:

- Billing account number
- Last name or business name associated with your account
- Email address

Need help with registering? Call the co-op office at 319-824-5251.

EMPLOYEES CELEBRATE SERVICE ANNIVERSARIES

Dan Stelpflug

Operations Manager

Aaron Bird

First Class Lineman
15 Years

Congratulations and thank you for all your hard work and dedication!

Holiday LIGHTING Safety

- Use holiday lights that are **certified by a safety testing lab such as UL.**
- Before using, **check each strand** for broken sockets, frayed cords or faulty plugs.
- Always **unplug lights** before leaving your home or going to bed.
- **Do not string** more strands together than recommended by the manufacturer.

HOW TO SELECT A NEW STOVETOP

BY MIRANDA BOUTELLE

When considering a new stovetop, it pays to consider the options that will make the most of your cooking experience. Fortunately, there are many great choices in the market today.

Most people who enjoy cooking have pretty strong opinions about their preferred fuel choice: gas or electric. Induction is a newer option for home stovetops, which is growing in popularity.

According to a study completed by the Electric Power Research Institute, 74% of the energy from an electric range is transferred to food, versus 40% on a gas range. Induction cooktops are the most efficient option at 90% energy transferred to food. Regardless of your stovetop choice, right-sizing pots and pans to the burner is important to avoid wasting energy.

Evaluating electric cooktops

Electric cooktops are a tried-and-true option for many homes and are typically the most affordable option. Glass-top models offer a cleaner look than the traditional coil elements. They are easier to clean but tend to be a bit more expensive. The most common complaint about electric cooking is that the heating controls are not as fast or precise.

Pros and cons of gas stovetops

Many home chefs prefer gas stovetops because you can easily see the size of the flame, a visual clue that helps you control the cooking temperature. Temperature adjustments are also faster and more precise than on electric stovetops. However, there are some concerns with safety and indoor air quality associated with gas stoves because gas emissions can be harmful to your health. To help reduce indoor air pollution, always use your exhaust fan when using your gas stovetop. Ideally, your exhaust fan should be vented to the home's exterior.

Access is also a consideration. Natural gas is typically available in more populated areas, while rural customers may need a propane storage tank installed outside their homes to use a gas stove.

Exploring newer induction stovetop options

An induction stovetop can offer a higher-end cooking experience than a standard electric stovetop, and some people prefer it to cooking on gas.

Induction stovetops use electromagnetic energy to heat the pan, reducing energy waste. Instead of heating the stove's surface, they heat the pans themselves, resulting in faster cooking times. They also allow for more precise temperature control, which can deliver better results.

Induction cooktops are typically more expensive than similar gas or electric models. They also require you to use specific cookware. Stainless steel and cast-iron cookware are both

compatible with induction cooktops. If you want to test your pots and pans to see if they are induction-compatible, do the magnet test. If a magnet sticks to the bottom of the pan, it will work on an induction stove.

If you are remodeling and have a gas range, consider running electrical to support an induction cooktop if you change your mind in the future. Setting up the power supply during a remodel can offer significant savings.

If you are considering making the switch, keep an eye on any incentives for your state or region. A rebate for replacing your gas stove with an electric one may be available under the Inflation Reduction Act.

Miranda Boutelle writes on energy efficiency topics for the National Rural Electric Cooperative Association, the national trade association representing more than 900 electric co-ops.

Induction stovetops use electromagnetic energy to heat the pan, reducing energy waste.

IOWA'S ELECTRIC COOPERATIVES CONNECT WITH CONGRESSIONAL DELEGATION IN WASHINGTON, D.C.

BY ERIN CAMPBELL

More than 25 representatives from Iowa's electric cooperatives traveled to the nation's capital in September to advocate for their co-op members. While in Washington, D.C., the group attended high-level briefings on key issues impacting the electric industry and met with all six members of Iowa's Congressional Delegation to discuss priorities and concerns.

Advocates shared concerns that could impact electric cooperatives' ability to provide reliable and affordable power, including federal Environmental Protection Agency mandates that may force electric generation plants to shut down prematurely. Additionally, co-op representatives talked about continued supply chain challenges and how they impact day-to-day operations.

Co-op advocates also asked their senators and representatives to support permitting reforms to the National Environmental Policy Act to avoid costly delays in the permitting process. The group urged the Iowa Congressional Delegation to authorize an increase in funding for the U.S. Department of Agriculture's Rural Economic Development Loan & Grant program as part of the Farm Bill reauthorization to support our rural Iowa communities.

Federal Emergency Management Agency disaster funding was also a concern, as the electric co-op group asked the Iowa Delegation to support supplemental funding for the Disaster Relief Fund to ensure that support is available should a natural disaster strike Iowa.

We appreciate the service of Iowa's elected officials and the tireless work of their staff who help look out for Iowans in the Halls of Congress.

KNOWING IS HALF THE BATTLE

BY DARCY DOUGHERTY MAULSBY

When I was growing up, some of the most popular toys had their own cartoon shows. This included G.I. Joe, who also narrated public service announcements (PSA).

These PSAs addressed something dangerous kids did unintentionally – such as running out into traffic. After the kids learned the right way to do things, each message ended the same: “Now you know. And knowing is half the battle.”

Fast forward to today. I’m concerned we’re letting young people wander down a dangerous road when we fail to teach them history, including the significance of Veterans Day each Nov. 11.

Its roots trace back to World War I. Fighting ceased when an armistice between the Allied nations and Germany went into effect on the 11th hour of the 11th day of the 11th month – Nov. 11, 1918. By 1919, the date became known as Armistice Day, although Congress renamed it Veterans Day in 1954. Veterans Day continues to honor American veterans of all wars for their patriotism, love of country and willingness to serve and sacrifice for the common good.

What are we teaching youth?

What’s the state of affairs as we approach Veterans Day in 2023? A recent Morning Consult poll found that only 16% of Gen Z (people born between 1997-2012) are proud to live in the U.S. Every U.S. military branch is struggling to meet its recruiting goals. Volunteering, in general, is also suffering.

A report released in January 2023 by AmeriCorps and the U.S. Census Bureau shows that less than one-quarter of Americans age 16 and older volunteered from September 2020 to September 2021. That’s down from 30% in 2019. Annual hours donated by volunteers has plunged during the

Tristan Blair (front row, left), 17, of Lake City participated in a wreath-laying ceremony at Arlington National Cemetery on June 20, as part of the Electric Cooperative Youth Tour. He's shown here with Owen Bell (Southern Iowa Electric Cooperative), and Lizzy Kremer (East-Central Iowa REC). Standing behind Blair is Veronica Schechinger (Nishnabotna Valley REC).

past two decades, sinking from 52 hours in 2002 to 25 hours today.

I think these disturbing trends are connected to “knowing is half the battle.” What are we teaching young people about the importance of volunteering and serving others? Do we invite our kids and grandkids to place flowers and American flags by the graves of veterans? Do we encourage students to learn about the sacrifices our armed forces have made to protect our freedom?

Youth Tour offers new perspectives

I’m grateful the annual Electric Cooperative Youth Tour, sponsored by many of Iowa’s electric cooperatives, offers students the opportunity to travel to Washington, D.C. This trip is dedicated to learning about electric cooperatives, American history and U.S. government, while giving students a greater understanding of their role as American citizens.

This year’s Youth Tour participant from my rural electric co-op (Calhoun County Electric Cooperative Association) was Tristan Blair (17) of Lake City. At Arlington National Cemetery, Blair escorted fellow students who laid the wreaths at the Tomb of the Unknown Soldier.

“I felt instant sympathy for anyone who lost a loved one in combat,” says Blair, whose thoughts also turned to his family members who’ve served.

These family members include Dennis Moulds (great-grandpa), Bill Marine (grandpa), Steve and Sheri Nockles (grandpa and grandma), Adam Nockles (uncle), Cara (Blair) Hove, and Kolby Blair (cousin). Some served in the Army, while others joined the Air Force. They included a tank mechanic in South Korea, a signal corps communication specialist and more.

“Thank you so much for asking me to get this information,” Blair told me. “I had no idea about some of that stuff.”

Knowing is half the battle. Once you plant the seeds of knowledge, good things follow.

“Thank you to all the veterans and current soldiers,” Blair added. “I wouldn’t have been able to do any of this without the sacrifices you made for my generation and the whole country.”
